PROFILE

Electronics & Computer Engineering undergraduate at Manipal Institute of Technology (CGPA 8.02/10) with hands-on experience building embedded systems in C/Embedded C, a working foundation in Data Structures, Algorithms, and SQL, and product prototyping experience in Figma. Currently strengthening Python and Machine Learning ahead of the May 2027 internship cycle. Interested in software engineering roles that combine product thinking with technical execution.

EDUCATION

Manipal Institute of Technology, Bengaluru | 2024 – 2028

Bachelor of Technology — Electronics & Computer Engineering | CGPA: 8.02 / 10

Relevant Coursework: Data Structures, Object-Oriented Programming, Computer Networks, Digital Electronics, Microprocessors

TECHNICAL SKILLS

Java ♦ C ♦ Embedded C ♦ SQL ♦ DSA

Python (Learning) ♦ Machine Learning (Learning)

Figma ♦ Canva ♦ Wireframing ♦ Git ♦ GitHub ♦ Arduino IDE

PROJECTS — COMPLETED (EMBEDDED SYSTEMS)

Human Following Robot

- Built an autonomous robot that detects and follows a human target while performing real-time obstacle avoidance, using ultrasonic and infrared sensors programmed in Embedded C on Arduino.

Air Quality Monitoring System

- Designed an IoT-based environmental monitoring system integrating multiple sensors with Arduino to collect and display real-time air quality data.

Smart IV Monitoring System

- Developed a healthcare-focused embedded system to detect IV flow rate and fluid levels, generating real-time alerts to improve patient safety.

PRODUCT CONCEPTS — DESIGN & IDEATION STAGE (FIGMA)

YourSchemes | *Government scheme discovery platform*

- Led UX research and wireframing for a citizen-facing concept to simplify discovery of fragmented government welfare scheme information.

Argus | *Version control for everyday digital life*

- Defined product architecture and timeline-based UX flows for a mobile concept applying Git's version-control principles to everyday smartphone activity.

INTERESTS & STRENGTHS

- Curious learner with a strong interest in Software Engineering, AI, and Product Development.
- Quick to learn and adapt to new technologies and tools.
- Self-motivated and eager to explore new concepts through hands-on projects.
- Strong problem-solving mindset and collaborative team player.

CERTIFICATIONS

- Java Programming — Coursera (Grade A+)
- Arduino Workshop — ARTPARK, IISc Bengaluru
