OBJECTIVE

Computer Science student specializing in Cyber Security with a strong foundation in network security, web application security, Linux, and threat detection. Passionate about identifying vulnerabilities, strengthening system security, and applying hands-on skills to solve real-world cybersecurity challenges.

EDUCATION

Bachelor of Technology in Computer Science and Engineering (Cyber Security) 2024 – 2028

Manipal Institute of Technology Bengaluru

CGPA: 8.60

- Relevant coursework: Network Security, Operating Systems, Data Structures, Cryptography Fundamentals

PERSONAL PROJECTS

ReBrew – Full-Stack Web Application | Live Project

Tools: HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, Razorpay

- Developed and deployed a production-ready full-stack web application with responsive UI, REST APIs, and MongoDB integration..
- Integrated secure user authentication, product management, and Razorpay payment gateway, implementing input validation, CORS, and rate limiting to enhance security.
- Optimized performance and deployed the application to the live domain (rebrew.in).

OWASP Juice Shop – Web Application Penetration Testing

Tools: Burp Suite, Browser DevTools, OWASP Juice Shop, Kali Linux

- Identified and exploited 10+ OWASP Top 10 vulnerabilities including SQL Injection, XSS, IDOR, and Broken Authentication using Burp Suite.
- Documented findings with CVSS severity ratings, proof-of-concept exploits, and remediation recommendations in a professional penetration testing report.

ELK Stack (Elasticsearch, Logstash, Kibana) – SIEM Project

Tools: Elasticsearch, Logstash, Kibana, Linux (Ubuntu VM)

- Deployed a centralized ELK Stack SIEM to collect and analyze logs from multiple sources, including Linux, Apache, and Windows Event Logs.
- Simulated attack scenarios and validated log correlation and threat detection capabilities through custom monitoring dashboard.

CERTIFICATIONS & VIRTUAL EXPERIENCE

Google Cybersecurity Professional Certificate

June 2025

Coursera

- Completed an 8-course program covering threat analysis, incident response, SIEM, Python, Linux, and security automation aligned with the NIST Cybersecurity Framework.

Cybersecurity Job Simulations

Forge

Tata, Deloitte Australia, Mastercard, AIG

- Completed SOC operations, IAM, and incident response simulations; practiced alert triage, access control review, and security reporting aligned with NIST and OWASP frameworks.

HANDS-ON PRACTICE & PLATFORMS

- **TryHackMe | Top 9% Globally | 50+ Rooms Completed:** Practiced reconnaissance, web exploitation, privilege escalation, and post-exploitation across 50+ hands-on labs.

TECHNICAL SKILLS

Languages: Python, C, Bash, HTML, CSS, SQL

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Operating System, Computer Networks

Web: HTML5, CSS3, JavaScript, Node.js, Express.js, MongoDB

Security: OWASP Top 10, SIEM, Vulnerability Assessment, Incident Response, Threat Detection, MITRE ATT&CK

Tools: Burp Suite, Nmap, Wireshark, Kali Linux, Kibana, Elasticsearch, Logstash, Git, GitHub

Operating Systems: Linux (Ubuntu, Kali), Windows
