## OBJECTIVE

Computer Science student specializing in Cyber Security with a strong foundation in software development, cybersecurity, Linux, and problem solving, passionate about building secure and scalable applications.

## EDUCATION

**Bachelor of Technology in Computer Science and Engineering (Cyber Security)** 2024 – 2028

Manipal Institute of Technology Bengaluru

**CGPA: 8.60**

- Relevant coursework: Data Structures & Algorithms, Operating Systems, Software Engineering, Network Security, Database Management Systems

## PERSONAL PROJECTS

**ReBrew – Full-Stack Web Application | Live Project** *Tools: HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, Razorpay*

- Developed a production-ready full-stack application following SDLC principles from requirement analysis to deployment using Git, Node.js, Express.js, MongoDB, and REST APIs.
- Integrated secure user authentication, product management, and Razorpay payment gateway, implementing input validation, CORS, and rate limiting to enhance security.
- Optimized performance and deployed the application to the live domain (rebrew.in).

**OWASP Juice Shop – Web Application Penetration Testing** *Tools: Burp Suite, Browser DevTools, OWASP Juice Shop, Kali Linux*

- Identified and exploited 10+ OWASP Top 10 vulnerabilities including SQL Injection, XSS, IDOR, and Broken Authentication using Burp Suite.
- Documented findings with CVSS severity ratings, proof-of-concept exploits, and remediation recommendations in a professional penetration testing report.

**ELK Stack (Elasticsearch, Logstash, Kibana) – SIEM Project** *Tools: Elasticsearch, Logstash, Kibana, Linux (Ubuntu VM)*

- Deployed a centralized ELK Stack SIEM to collect and analyze logs from multiple sources, including Linux, Apache, and Windows Event Logs.
- Simulated attack scenarios and validated log correlation and threat detection capabilities through custom monitoring dashboard.

## CERTIFICATIONS & VIRTUAL EXPERIENCE

**Google Cybersecurity Professional Certificate**

June 2025 *Coursera*

- Completed an 8-course program covering threat analysis, incident response, SIEM, Python, Linux, and security automation aligned with the NIST Cybersecurity Framework.

**Cybersecurity Job Simulations**

*Forage Tata, Deloitte Australia, Mastercard, AIG*

- Completed SOC operations, IAM, and incident response simulations; practiced alert triage, access control review, and security reporting aligned with NIST and OWASP frameworks.

## HANDS-ON PRACTICE & PLATFORMS

- **TryHackMe | Top 9% Globally | 50+ Rooms Completed:** Practiced reconnaissance, exploitation, privilege escalation, and post-exploitation.
- **NeetCode | 50+ Problems Solved:** Practiced Data Structures & Algorithms covering arrays, strings, linked lists, stacks, queues, trees, and dynamic programming.

## TECHNICAL SKILLS

**Languages:** Python, Java, C, Bash, HTML, CSS, SQL

**Core CS:** Data Structures & Algorithms, Object-Oriented Programming, Operating System

**Web:** HTML5, CSS3, JavaScript, Node.js, Express.js, MongoDB

**Security:** OWASP Top 10, SIEM, Incident Response, Vulnerability Assessment, MITRE ATT&CK

**Tools:** Burp Suite, Nmap, Wireshark, Kali Linux, Kibana, Elasticsearch, Logstash, Git, GitHub

**Operating Systems:** Linux (Ubuntu, Kali), Windows
